Subject: Assessment of road conditions of Concession 4 and Puslinch Township's response to recent accidents

Hello,

I'd like to request an assessment of the road conditions of Concession 4 between HWY 35 and HWY 32. In addition, I would like to know how the Township intends to respond to the rash of severe accidents that have taken place at the corner of Concession 4 and sideroad 10 N since the section of Concession 4 along Little Tract was paved. I and several of my neighbours would like to see a four way stop installed at this dangerous intersection.

Regarding a road assessment, I recall reading recently in our community newsletter that there is a type of assessment that factors in conditions of the road to provide a recommended speed limit.

Concession 4 has characteristics including hills and narrow shoulders that may warrant a reduced speed limit. In addition, the recent severe accidents along this section of the road should be a consideration.

I share my concerns about the safety of this road with my neighbours. We are wondering what is required in order to move this request forward. Do we need a petition signed by neighbours?
