Hi Jana,

Thank you for providing the above referenced application for review. Since this property is located in a vulnerable area (wellhead protection area, issues contributing area, intake protection zone etc.), but the activity(ies), as indicated, would not create a significant drinking water threat, the application can be screened out and it does not require a Section 59 notice under the *Clean Water Act*.

I have attached a map showing the property and Wellhead Protection Areas for your reference.

Kind regards, Danielle
