Water Supply Strategy Update

Region of Waterloo

We are updating our water supply strategy to ensure a safe, secure and sustainable water supply for Waterloo Region as we continue to grow.

What to expect?

In this study, we will look at future water supply needs for the community through to 2051. A range of options will be developed and evaluated to create a strategy.

What's the process?

This study is being completed as a master plan and will follow the requirements of Phases 1 and 2 of the Municipal Class Environmental Assessment (as amended February 2024), an approved process under the Environmental Assessment Act.

Please join us at Public Meeting No. 2

The second public meeting is being held to share a study update since the last meeting in December 2024 and present the shortlisted alternatives for water supply. The meeting will also discuss the evaluation approach to select the preferred alternative and provide an opportunity for you to share feedback on the alternatives and what matters most to you in the evaluation.

Date: Tuesday, November 17, 2026

Time: 7:00 pm – 8:00 pm

Location: Virtually; register for the meeting at engagewr.ca/watersupply

Date: Tuesday, November 24, 2026

Time: 6:30 pm – 8:30 pm

Location: Main Lobby, 150 Frederick St, Kitchener, Ontario

Stay in the know

The best way to get involved in this study, receive updates and next steps, is to subscribe to the EngageWR project page at engagewr.ca/watersupply.
